LEHVOSS Nutrition returns to Vitafoods Europe 2026 in Barcelona (**5-7 May, Stand 3C72**). This year, we are showcasing our latest ingredient innovations with a strong focus on **cellular health, metabolic efficiency, and longevity**.

Next-Generation Gut Wellness

New in our range, Solnul[®] is a clinically validated prebiotic resistant potato starch (RS2) with >60% resistant starch and >63% dietary fibre. Upcycled and naturally occurring, Solnul[®] offers excellent tolerability, along with a neutral sensory profile, and scientifically researched benefits for gut health, enhanced intestinal barrier function, improved nutrient absorption and metabolic health.

A new 2025 clinical study confirms Benicaros[®] fast "precision" prebiotic power. After just four weeks, healthy adults showed meaningful improvements in gut microbiota composition and immune cell activation. Most notably, Benicaros[®] drove a rapid rise in beneficial Bifidobacteria — key player in digestive and overall wellness.

Breakthroughs for Cellular Health and Longevity

New! Nucleotide Blend, a carefully selected mix of nucleotides that supports DNA and RNA synthesis and key processes of cellular renewal, backed by research.

From the makers of **PureWay-C[®]**, the **New PureWay[®] Creatine** delivers superior creatine compared to standard creatine forms with studies highlighting its role in cellular protection beyond athletic performance.

New Research on OptiMSM[®] the leading, branded form of MSM indicates MSM's role as a methyl donor, which may aid cellular health in exercise recovery.

New Research on PureWay[®] Glutathione shows how this interesting ingredient delivers glutathione into cells at twice the rate of standard glutathione, restoring depleted intracellular levels more efficiently.

New Research on Soluble-Dispersible PureWay[®] Q10 demonstrates the ability of this ingredient to enhance cellular uptake, support ATP production, protect against oxidative stress, and promote overall cellular function compared to standard CoQ10.

New Research demonstrates how Witholytin[®] Ashwagandha may robustly influence mitochondria in cortical neurons, contributing to stress adaptation and neuroprotection via Brain Derived Neurotrophic Factor (BDNF) Sirtuin 1 (SIRT1) signalling.

85+ Publications on Longvida[®] confirm cellular access to free curcumin and benefits on core stress factors including inflammation, oxidative stress, and mitochondrial dysfunction.

New Research highlights that Pomella[®] Pomegranate Extract may outperform traditional solutions in oral health and demonstrate notably greater short-term antiplaque effects, alongside with effectively reduce gingival inflammation, and salivary bacterial count.

Did you know that Zooca[®] Calanus[®] Oil has been shown to activate sirtuin pathways, often referred to as “longevity genes,” promoting improved metabolic efficiency and healthy ageing? Come and learn more at our stand.

Innovations for GLP-1 Therapy Support

Discover how Benicaros[®] may support GLP-1 analogue therapy for weight management by enhancing gut health, boosting beneficial metabolites, and helping improve tolerability—three aspects that have been widely researched in this ingredient. Its unique precision prebiotic profile may help stabilise the gut microbiome and reduce gastrointestinal side effects during treatment.

Learn how PureSea[®] Natural provides traceable and sustainably rich seaweed, supporting optimal thyroid function and metabolic health. By maintaining energy balance and metabolic efficiency, it can complement GLP-1 analogue therapy and appetite management.

Zooca[®] Calanus[®] Oil offers clinically studied, long-term metabolic support, which aligns with the evolving needs of GLP-1 therapy users. Its unique wax ester composition helps maintain muscle mass and metabolic health during weight stability phases. Zooca[®] Calanus[®] Oil offers a premium, science-backed, unique ingredient for brands wanting to lead in the emerging category of long-term metabolic stability.

Don't miss out on our Sample Boxes!

These sample boxes provide a physical representation of some of our brands and their applications, together with comprehensive product information and supporting scientific data. They serve as an effective way to evaluate our latest innovations and, for select products, experience their benefits — all in a compact and appealing pack.

From the Arctic and backed by robust science, **discover sustainable Zooca[®] Calanus[®] Oil**, supported by clinical research for metabolic health and healthy ageing.

Discover the versatility of G0tab[®] Omega-3 DC Power through our Bone Shape tablets, which are designed to address the specific needs of valued pet companions while offering an attractive visual presentation.

Take the 7-day challenge with Univestin[®], a plant-based solution designed to support fast joint support within 3–7 days.

Explore Our Extended Portfolio

Discover our PlantNutra[®] brand, featuring a range of plant-based vitamins, minerals, and other innovative active ingredients, as well as Essentials by LEHVOSS, our premium standard raw materials. In addition, our PHARMAGNESIA[®] line offers premium-quality minerals for food supplements, pharma and functional foods and beverages.

Visit our stand to explore new research, new product solutions, and discuss your formulation ideas with our expert team.
